

**INVESTMENT STRATEGY**

The Fund focuses its trading in futures contracts. It will look for opportunities globally, with an emphasis on but not limited to equity indices and commodities.

The Fund focuses on swing trading which normally lasts within 1 week to 3 months and divided into 2 parts, fundamental outlook and technical indicator. The Fund will aim to identify the tops and bottoms of such market swings.

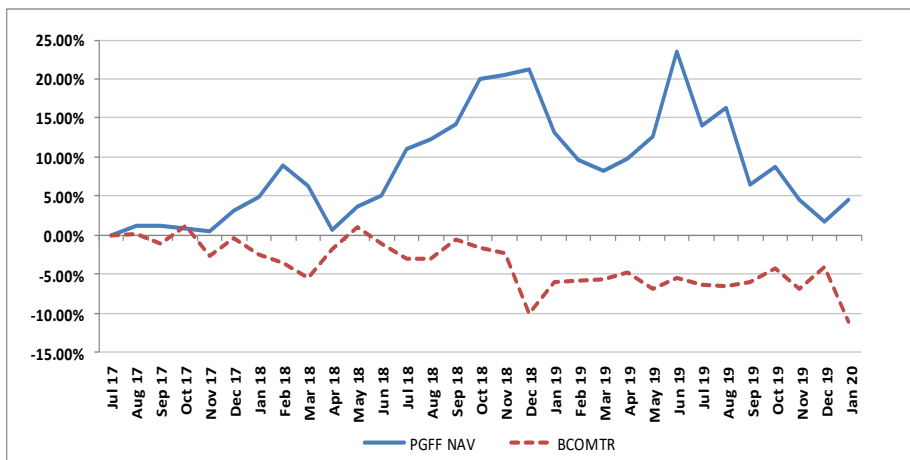

The Fund seeks to capitalize on market opportunities by using a disciplined trading approach that takes into account the risk-reward trade-off and the entry price for each trade. The Fund may hold both long on short positions.

The leverage factor of the Fund should be no more than 300 percent of the total fund and most of the time shall be between 100-250 percent.

**INVESTOR PROFILE**

The Fund is suitable for Sophisticated Investors who are willing to accept high risk in their investment in order to achieve medium to long term capital growth. The Fund aims to achieve absolute returns in both rising and falling markets while maintaining a commitment to capital preservation.

In the event there is a conflict between the client's interest and the interest of the Company, its Directors, Investment Committee Members, designated Fund Manager Representative(s) and employees including its associates, the clients' interests shall prevail.

## MANAGER'S COMMENT

### Market Review

Crude Palm Oil (CPO) futures: For the month of January 2020 the most actively traded continuous 3rd month CPO futures contract found its recent top at MYR3,150 per metric ton on 10th January 2020, after that CPO price went all the way down to the month low at MYR2,575 per metric ton on 28th January 2020. This is because of the Coronavirus incident in China and this incident cause China reduce a lot crude palm oil consumption. At the same time India reduce the import of crude palm oil from Malaysia after its criticism of India's actions in Kashmir and a new citizenship law. Beside that, India has raised the import rate for crude palm oil. Therefore within the month crude palm oil price keep facing pressure because India and China are the top 2 imported nation for Malaysia crude palm oil.

### Market Outlook

For the coming month, we expected the CPO price to continue sideways trading. There are 3 main things we need to keep track of closely, firstly is the Coronavirus incident in China, if the incident is able to be under control in coming month, then the demand of China might rebound. Secondly is the diplomatic relations between India and Malaysia, if the current situation gets better India might restore their purchases as well. The last one is the production situation of the crude palm oil. For coming month these 3 main things will affect the crude palm oil price.
